DETAILED ACTION

DETAILED ACTION

In view of applicant's comments in the appeal brief filed on 8-18-06, that the explanatory remarks which the examiner included with the advisory action amounted to a new grounds of rejection, the finality of the previous rejection is withdrawn, and a new final rejection is given.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-13, and 15-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anc in view of Mizushima, both of record, for the reasons given in the previous rejection, hereby incorporated by reference. The examiner's remarks with the previous advisory action are also incorporated by reference into this new action. The point that the examiner was making is that the terminology used in the references may differ from that used by applicant even though the actual structural configuration, or process limitations are similar.

Since the main issue in dispute appears to center on the term "continuous" in describing the precipitate region, the examiner also wishes to remind applicant that the Anc reference, which has been of record since 9-12-05, also shows an embodiment in FIG. 6. whereby the implantation through the apertures formed in the surface masking layer (32) would appear to produce a noncontinuous precipitate region in the substrate, as well. See the description in Anc at col. 7, l. 1-5.

Because no new references have been applied, and the previous rejection has been maintained, with some additional clarification, **THIS ACTION IS MADE FINAL**. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2815

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Wojciechowicz whose telephone number is 571-272-1739. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ken Parker can be reached on (571) 272-2298. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
